

# RESTORE Feedback

*A selection of positive personal reports from people who are using Restore, with identities removed and edited for brevity. Individual responses to Restore may vary, and those related below may not be typical.*

This is the best thing I've ever done for myself in my life. I mean this. I was to have parts of my colon out months ago. I'm feeling wonderful now getting more strength with each day. My neighbor cannot believe the change in me. He bought 2 bottles for himself and his wife. My son and his wife are taking Restore too! I'm telling the world!!!

I've spent vast amounts of money on doctors and their useless prescriptions over 30 years that never helped me. I listened to all the talks and presentations on your website and learned so much. Ordered a bottle and started feeling better in less than a week. Last March, I almost died – they had to drain an abscess, sent me home to get well enough for surgery, told me to expect a bag after surgery. Ha Ha. No bag for this gal!!!

So thank you so much for working on this and helping us poor people, suffering from all kinds of gut issues. Keep sending my Restore!!!!

---

My son, who is 3 months shy of his third birthday, has autism spectrum disorder. Along with his developmental delays, social impairments, and sensory issues, he has also had gut troubles. His body has gone back and forth between extreme diarrhea and extreme constipation since birth. I heard positive results from friends who had heard of Restore and decided to give it a try. Not only did my son's BM's completely balance out within two weeks, but he also went from being nonverbal to reciting his ABC's and numbers (1 to 100), singing full songs, and saying up to 3 words sentences in conversations with me and other close adults. I am in awe of what Restore has done for my son. Thank you, Restore!

---

I have had part of my colon removed and currently have a temporary ileostomy bag. I was having lots of watery stool and undigested food, and even had visible ulcers on my stoma. After taking Restore for a week, my ulcers have disappeared and my digestion has been normal. This is saying a lot because I have tried acupuncture, probiotics, prebiotics, diets, medications, herbs, vitamins, essential oils and other things, but nothing seemed to help. After only one week on Restore I have more energy, clarity, concentration, better sleep, less pain, and more appetite and great digestion. I have hope that as I continue to take Restore,

my weight will "restore", my skin will "restore", my immune system will "restore", and my life will "restore"! Thank you for your great product!

My entire family (ages 3 to 41) have been taking your supplement and it has been a game changer for us. I initially began researching products for my son who is on the autism spectrum, exhausting every supplement and protocols. I became a master mixologist but still I found I was facing setback after setback. I happened to be on with my biomedical healing group when Restore was mentioned. Many people were claiming their non verbal son/ daughter began speaking, engaging eye contact and big improvements were taking place. I was skeptical but had to give it a try. We starting out very minimal and gradually worked up to 3 doses a day. I started seeing visible changes. He started engaging with me in conversations. He laughed, yes laughed really hard! We all decided to take this and our entire family is healthy and no more bellyaches, bloating(me) or plain brain fog. Thank you for your energy and hard work going in this product. I would love to be able to sell this product to doctors here in south Florida. If you are ever hiring, I would definitely sell a lot of this. Everyone should have this in their medicine cabinet! Again, thank you!

---

I have had serious issues with my gut whenever I eat wheat in the past few years. I have also known for over 20 years that wheat caused an allergic reaction in me that manifested as a cough. But in the past few years, my gut issues had gotten so bad that I did not want to leave the house. Even after I went gluten free, I still had episodes of urgent diarrhea more often than I would like.

I heard about Restore in late November and bought a bottle a couple of weeks later. I was skeptical about how it was described as a "fix". Now after only two weeks of taking this stuff, I can tell you that it WORKS!! I ate wheat during Christmas for the first time in over a year. This was more or less as a test to see if in two weeks progress was made, as it was claimed. Nothing bothered me. I ate some again the next day and still no distress. While I do not plan to go back to a life of eating wheat, pasta and bread all the time by any means, it sure was nice to enjoy my friend's spanakopita, some fresh sourdough bread, and some yummy banana pudding, all with no gut problems at all!!! This is truly amazing to me.

I've been making kefir, raw milk yogurt, and drinking raw milk for 18 months. This has helped my gut and my allergies but has not "fixed" my explosive issues. Restore seems to have indeed "fixed" that. Thanks so much! Great product as far as I can tell now. I want to know all I can about this amazing product.

---

It's been a month since I've been using this product. I'm 47 and would wake up every day with pain in different areas of my body. Stopped going to the gym 3 out of 5 days thinking I'm overdoing it, until I researched online myself because doctors look at you like you're a drug addict looking for pills. Someone told me if you're gluten intolerant that could be the

problem. So figured I would give Restore a try and haven't had any pain since!!! It really helped me.

My son Maddox is 11 years old. He was diagnosed with severe autism when he was two, but we knew earlier on that there was something not right. Maddox never talked, never babbled, he never made much noise until around age 6. We could get him to say a few words with a lot of prompting. He has never been able to accept change without huge meltdowns, temper tantrums, etc. Being around too many people overwhelmed him. My brother called me one day to tell me about this Restore. We have been told about a million different things to try with Maddox. We haven't really had much success, but I told him I would give it a try. Maddox has been on Restore for three months, and I can honestly say its been amazing! Around the first month mark, I could hear him talking to himself, not just mumbling but actually saying the characters to his favorite show Toy Story. I was stunned. Listening to him saying "Woody, Buzz, Jesse, Mr. Potato head, Rex," not repeating it but actually listing it himself was something he has never done. After two months in he starting singing songs, and I can listen and hear what he song is singing. Christmas time is usually a stressful time at our house, but he was doing so well we thought we would risk it and take our kids to Universal Studios. (They don't make special-needs kids wait in line.) We were prepared for the meltdowns and the breaks we thought he would need in that kind of atmosphere. However, he had a few hiccups along the way but not a major meltdown! The week after Christmas is what I dread the most every year, because in the past he has a really hard time going back to school and doing what the teachers ask him to do without acting out. When he started school again we did not have a single problem. He is doing amazing and his teacher says he is working harder than ever. I am totally impressed with the results our son has had with the product Restore!

Thank you for this product, I can't wait to see what else my son can do on this product!

---

I have had thyroid issues for 20 years, with nodules. I have been on Restore for just under a month, and my antibodies have already decreased. I've been off gluten and most grains for many years, eat clean and organic, no sugar, healthy oils, fermented foods, targeted supplements. None of those interventions moved my antibodies. Restore did.

---

I have been using Restore since December for my son with autism and have seen undeniably wonderful results. He is on the GAPS diet as well, and has been since July, but it wasn't until we started Restore that he really turned a huge corner. His autism symptoms are almost completely gone and with Restore he has actually been able to eat a few foods that he couldn't previously as they would upset his stomach and cause severe constipation.

My husband has had intestinal problems for 30+ years. He has been on Restore for 4 years and has seen huge improvements on it. When he's gone off, he's flared.

---

I have had digestive problems for decades and am seeing results with Restore that did not happen with diet change. Now off probiotics and enzymes. Abdominal pain gone completely for the first time.

---

I have now been on Restore for 8 weeks. I feel that my gut is continuing to improve. I am now almost entirely off enzymes. I weaned myself off the enzymes gradually. Also, I am noticing some improvement in my chronic fatigue. It is such a relief to experience a marked improvement in my irritable bowel symptoms. I am a believer in the product.

---

I was constipated for years. I have been taking Restore for 5 months now and must tell you it has improved my elimination so much.

---

I have been on Restore now for 2 months and am very happy with the results. My gas and bloating have been reduced significantly and I feel wonderful.

---

Five weeks on Restore: bloating stopped and the most amazing gas sounds have stopped. I'm in constant pain with RA. Yet, blood test last month was the best I've had in years. I've had large goiter on thyroid for perhaps 3-4 years and it is getting smaller. I have 2 large nodules below each elbow from RA, feeling at some point the body will eliminate these. Have good energy, sleep and meditation. I have painful damaged feet and knees. My knees are less inflamed, wonder if body can restore/rebuild damaged joints, and increase bone density? Why not! Restore is giving me hope, and I know I'm heading towards the end of the tunnel to the Light. Heal the gut ...heal the body.

---

My doctor recently recommended this product. I only had to take it for a couple of days and I could tell the improvement. She explained that those with gluten issues or digestion problems will benefit greatly from this product based on her patients experience with it. For those with gluten issues, she said we can eat gluten and not have the ill effects, however, she wanted to make it clear that this product is not intended to give free license to eat gluten and still highly urges that efforts be taken to reduce or eliminate eating foods with gluten.

Now, frankly, this product has little or no taste and it is liquid. That was difficult to get used to because it seems like there isn't much basis to the product. However, the improvement speaks for itself.

---

I am a Florida licensed nutritionist and bio-energy medicine practitioner. I watched the webinar that Dr. Bush did with Jeff at the Institute of Responsible Technology, which I found very eye-opening, and have since been using Restore with my patients. Using bio-resonance testing, I am finding that about half of my patients test positive for glyphosate in the gut, brain and kidneys and don't seem to be able to clear it. Using the Restore and having them avoid possible sources of glyphosate, I am seeing many chronic, seemingly unrelated health issues resolve.

I did want to share one specific case history. A woman from a neighboring town emailed me pictures of herself showing her generalized, inflamed, crusty skin which no medical intervention had helped. I emailed back and suggested that she avoid wheat and dairy products, which she did, and had some improvement. She was then able to come to the office and she tested reactive to eggs; avoidance of this gave her further improvement to about 50% reduction in symptoms. I then heard about glyphosate and Restore. When she came in for her next follow-up, I tested her for glyphosate which showed in her gut, brain and kidneys. She contacted the manager of her city water system and got a copy of the city's water test, which showed evidence of Glyphosate in the city water. Avoiding possible sources of ingested glyphosate and using Restore resulted in resolution of her skin condition, except on her scalp. I realized that she was still showering in city water, and the hair staying wet was allowing the water to be in contact with her scalp. I told her to add a teaspoon of Restore to her bottle of shampoo and conditioner. She emailed to say that her scalp completely normalized in 3 days of adding the Restore to her hair products.

---

Let me just say this. My completely unbiased opinion. I have no dog in this race.

I've been having HORRIBLE gut issues for over 2 years now. I've been to the E.R. over a dozen times, had thousands of dollars in tests and seen multiple specialists. NO ONE could tell me anything. No reason as to why I was experiencing the issues I was. When I could eat, I had

probably the best diet of anyone I knew. Fresh organic, gluten and dairy free, no red meats etc. Doctors were clueless. Wanted to dope me up on antacids, morphine and painkillers. I refused them and they wrote me off with an IBS diagnosis. Now, I can't say whether that ultimately was the issue, but I know I was suffering daily. Like seriously suffering. The doctors had no answers other than painkillers.

I've tried explaining. I was on a 2-month liquid diet to try and heal my gut. Do you have any idea how agonizing it is to go without food for 2 months? I've spent hundreds in supplements and nothing has scratched the surface. At. All.

Anyhow, I literally stumbled across Restore on Amazon one day and had the opportunity to purchase it at a huge discount, so I did. I honestly had no clue what it was even for. It came in the mail and I briefly scanned over it to make sure I wasn't ingesting a bunch of chemicals, and took a shot of it. I had taken this 3 days and all of a sudden all of my symptoms were gone. Like completely gone. Two years of fighting doctors. Being poked and prodded. Having doctors trying to force feed me pills. Being sick every single day ... it was gone. I felt like for the first time I could leave the house and eat out without the fear of having massive abdominal attacks. I hadn't even connected the dots as to why everything had seemed to go back to normal. Two weeks passed and I was still taking this and then one day I thought, "what am I even taking this stuff for?" That's when I realized that it was THIS stuff that had made 2 years of pain and suffering come to a complete halt. This is me 3 weeks later. I kid you not. This stuff IS working for me. For ME. I can't say it would do anything for anyone else but I promise you that for ME Restore has honest to goodness restored my life.

Of course, that's just MY experience but I'm so very thankful that I stumbled across it!

---

5.0 out of 5 stars Incredible stuff!

I've got a typical profile of a person with gut problems – was a C-section, a lot of infections as a baby. As a teen/young adult, if I didn't take very good care of myself, I got chronic sore throats and lung infections. In middle age, autoimmune disease and Lyme. Constantly struggling with diet and treatments, very low energy and lots of bad patches where I was basically bedridden. Have eaten a bazillion probiotics over the years along with a bazillion antibiotics.

But WOW! Restore has changed everything! That underlying feeling of fragility – like my health is about to go wrong in a really bad way – is gone. I feel strong, I'm sleeping well, losing weight, exercising, getting stuff done! I feel like I have my life back. Incredible product and I'm so so grateful.

The first improvement for me was better sleep. I started dreaming for the first time in years and stopped waking up to pee. That was in the first month, and the energy etc. has come later. For me the improvements have been slowish but very powerful. Life-changing!

Thank you!

---

I cannot even begin to describe what a difference this product has made for me in just the last 5 days since starting. I have autoimmune issues, struggle with abdominal discomfort all day every day, foggy head, forgetful, crave sweets all the time, chronic pain, and more. A friend has been taking Restore for a little over a month and told me how much it helped, so I decided to give it a shot. I am never too hopeful with anything because I've tried everything from gluten free to the elimination diet, with no improvement. I woke up after day one and had no stomach ache, which is the first time in over 8 months. Throughout the day I noticed I wasn't wanting sugar, which is very rare for me. I am now on day 5 and have noticed I am more regular, but definitely not rushing to the bathroom, I am not in horrible pain all day. I ABSOLUTELY cannot wait to see how I am doing in another week or month. It is expensive, but so worth trying. And with the money I was spending on trying everything else that never worked, this is so worth it. One more thing I forgot to mention, typically when I try a product that is for gut health, I experience a "die-off" of candida which causes flu-like symptoms. I have not felt one bit of that with this product :)

---

I have been struggling with stomach problems for many years, taking Zantac regularly, and PPI during flare-ups. My problems were periodic bloating, and what felt like hives in my stomach and up my throat, with sores on my tongue, reflux issues, food sensitivities with gas and irregularity. I have been taking Restore for a week, and am amazed. I quit my PPI meds and I can even drink a glass or two of wine without problems now. I know not everyone's stomach issues have the same cause. I am sorry for those who this did not work for. For me, it is better than anything I have tried since I started having problems 20 years ago.

---

I've been giving Restore to my 7-year-old who has severe seasonal allergies, food sensitivities and bad eczema. Knowing that her gut had to be out of balance, I started giving her this, 2-3 times daily, at least 15-30 min before meals. It has been nothing short of miraculous. Her skin cleared up, allergies vastly improved, and dark circles under her eyes are gone. Honestly a wonderful product, and I've begun to give it to the rest of my family.

---

Just my two cents here. I have suffered for over 6 years with a debilitating condition ... much of which I am sure resulted from my self-abuse with toxic foods and chemicals that I ingested throughout 35 years of the SAD diet plus alcoholism ... I probably deserved what I got. However, I paid my dues and cleaned up my act in every possible way in an attempt to get healthy, and for 5 years suffered daily anyway. No doctor could help at all. I started Restore (and 3 other supplements) earlier this year, after watching Dr. Bush's presentations on YouTube. I always managed my expectations with products after all the crap I had been sold over the years promising "this and that". Within 6 days on Restore I noticed a huge positive change in my digestion. This may be TMI, but if it helps one person it's worth it. My stool for 5 years (it's hard to describe) but it was lightly packed and when I flushed it basically dissipated into the water ... it exploded kinda. Within a week on Restore my stool was about 2 feet long and solid ... no dietary changes. On top of this, most of my annoying symptoms including brain fog cleared up. This has been my experience with Restore. My whole family takes it ... it obviously does work for me.

---

I have been challenged with gut issues and diarrhea for decades. I've been 100% gluten free not by choice for fifteen years, way before any products existed to make life easier for the gluten-free eater. I thought I knew everything there was to know about urgency, diarrhea, and how to prevent it. But lately my body seemed to be going totally out of control and I'd have crazy bad diarrhea for no reason. I literally couldn't leave the house some days because it was nearly constant and the warning signs were not there in advance like I was used to. I was getting pretty sick of it and wondering if this was the new normal. I stumbled onto a review for this product on Dr. John Grey's website. I had previously tried lithium orotate based on his review and a NY Times article touting its impressive effects, so I thought this guy knows his stuff. I'll check out this Restore and see if it does anything for me. Honestly, I didn't have too high of hopes for what would happen, but I thought I'm desperate, so I'll give it a try. I started with one teaspoon with breakfast. Didn't think much of it. Kept taking it a few days. No problems. Decided to add another teaspoon at night. Now it's been over two weeks. I haven't had diarrhea once! Not even loose stools. I don't know how or why, but this stuff seems to really work for me. I'm thrilled that my gut has calmed down and I'm going to keep taking it and see how long I can go without having a problem. It's incredible to get back a measure of confidence that I'm going to make it through the day without a sudden emergency or surprise bathroom crisis. This has improved my quality of life dramatically. If it keeps working, I'm going to take this stuff forever. Thank you to whoever created Restore! :)

---

This is an amazing product. Basically protects us from Round-Up. Yes, Round-Up in our food supply causes many chronic diseases. If you look at the CDC (Center For Disease Control) most common chronic diseases in the U.S., you'll find that the upward rise of ALL the diseases (ex: diabetes, Alzheimers, obesity) match the exposure of our food supply to Round-Up (or

glyphosate). Monsanto (the makers of Round-Up) buried the data that shows that it causes cancer – and they got away with it. What happens is Round-Up (that also kills weeds) doesn't interact with humans. BUT it does kill the bacteria that are responsible for keeping bad stuff in our food from getting through our intestines into us. Round-Up is used in farming practices to create weed-free environments for many of our foods; and the farmers use Round-Up ready GMO (man-made genetically modified organisms) – crops that don't die when sprayed with Round-Up. And it's everywhere – even in our water – and it takes a long time to get it out of the soil! Anyway, once those bacterial connections to our intestines are ruined by Round-Up, all the bad stuff gets into our system, and it's like pinballs colliding in us and our brain leaks the toxins in.

The reason I know all this is that my daughter was diagnosed with multiple sclerosis 2-1/2 years ago and I am a physician (M.D.) and I have researched the data constantly since then. Basically when I started my daughter on Restore (since the meds didn't really work) within 30 MINUTES after taking it she wasn't dizzy – which was her main symptom – and nothing had touched it for 2 years. She has now been on it for 5 months and her symptoms of dizziness have gone from an 85 on a scale of 100 to a 5!!

Absolutely proving that her MS is from intestinal abnormalities. The medical community is behind on this information. I definitely would have pooh-poohed it had I not researched it for my daughter's sake. Start off slowly if you have an autoimmune disease or intestinal abnormalities. This stuff protects those who don't have any disease and it is EXTREMELY safe. BTW, Round-Up is probably is the reason for the exponential rise in autism. Read the research by Dr. Zach Bush – absolutely amazing that Restore (which is really just prehistoric dirt water before glyphosate hit us) – blocks the effects by recreating those tight junctions in our intestines that are created by the interactions of many species of bacteria that had been lost because of Round-Up and the other herbicides in it. FYI, once you start taking Restore you will no longer need probiotics because Restore brings back up to 20,000 species of bacteria to our intestinal tract. Probiotics create a mono culture which is nowhere near what we need. Dr. Thomas M. Reynolds, M.D., FACS. BTW, I am in no way associated with Restore.

---

Your product is a godsend. I have been battling sinus infections and sinus allergies for a long time. Recently I had a nagging cough that would become uncontrollable and result in wheezing. I learned about Restore from my Ideal Protein Diet coach, and both me and my wife decided to try it. WHAT A DIFFERENCE!!! I kid you not, my cough began to diminish within just a few days, and within 10 days the cough was totally gone. I could breathe and talk and laugh without coughing. The constant flow of phlegm in my throat ceased. For my wife, it helped her with her allergies and reduced her acid reflux. Thank you so much. I tell everyone that they should be using Restore.

This supplement has changed my reality. I am taking 2 teaspoons a day. My brain fog improved within 2 days of starting Restore and continues to improve daily. I have significantly less fatigue in the 2 weeks I've been taking it. I'm 44-year-old vegetarian with a history of food

intolerances to dairy, gluten, soy and eggs. I finally eliminated these foods 2 years ago when I realized my fatigue, brain fog, and stiff joints were related to my diet. Well, this definitely helped my exhaustion and my ability to get through my day, but I was still tired and I never felt my head was completely clear. So I kept searching for solutions since mainstream medicine was not able to help me. I've spent probably an average of a couple hundred dollars per month on supplements and cleanses in the last 2 years. I've NEVER come across anything that works as well as Restore. It is unbelievable – my world feels normal. This past week to experiment, I ate pizza and ice-cream. I've detoured from my usual "clean" non-processed diet maybe on 3 occasions in the past year, and I typically start feeling the results within 48 hours of my indulgence. This time, no problem! I'm unsure if this means I can go back to eating all the foods that were giving me problems ... the list of foods I could eat was getting so small. I think I'm going to keep all the major allergenic foods out of my diet for at least another 6 months and then gauge it and see. But in any case, I am so, so grateful to be getting my life back, and I can't thank Dr. Bush and the team who worked on creating this product enough. I am so hopeful I will continue on the road to health and I will be telling everyone I know about this product:) Thank you, thank you!!

---

Hello, I am currently using your product and feel better than I have felt in years! I have several skin issues from DSAP to squamous-cell skin cancers. I can honestly say that the appearance of my skin has improved in just a week.

---

Love your product! I was having a real hard time balancing my gut while suffering from gluten intolerance. My system was being quite finicky and sensitive. Since using Restore, if I slip a little bit with the gluten while eating out, my system is not finicky, and I don't have to worry about horrible after affects. It's made my life a lot easier!

Thanks again for such a great product!

---

Magic! Thank you for developing this natural product. I have struggled with bowel problems for 10-plus years (I'm talking miserable) and had little faith in ever finding a solution. I've tried many approaches with the guidance of my GP, made dietary changes, worked with gastroenterologists, extensively self-researched, stool tests, probiotics, searching for an answer, etc. I've treated myself daily with oregano oil for the past year or more, making the

condition manageable, but I was still having bouts of periodic misery. Then my GP suggested Restore and IT WORKED! I sip a small amount several times a day before meals and I'm regular. Amazing! I've always suspected processed food sources to be problematic. Who would guess that a lignite extract could change my well being. The product isn't inexpensive, but it works and that's priceless to me. My GP can't tell me how long I might have to take it, but I'm okay with continuing as it takes to restore my health. A real life-saver!

---

#### Amazon review:

With the zillions of supplements out there, it is hard to figure out what to choose. This is a keeper. I heard about this product from Dr. Joe Mercola who mentioned it in one of his podcasts. When it started helping me, I then I did a deep dive into why it was working. It was formulated by a triple board-certified physician, Zach Bush M.D., who is brilliant. It is endorsed by Moms of America and people like Gary Gordon M.D., the father of chelation.

What does it do? It relieves the inflammation that is the cause of all our chronic diseases, such as diabetes, autoimmunity, fibromyalgia, ADD, autism, etc. It is a great antidote to the herbicides and pesticides in our environment and it is an antidote to the gluten (glyphosate) sensitivity we are all experiencing, whether we know we are sensitive or not.

It is modified prehistoric dirt water, no kidding, which tightens the junctions in our gastrointestinal tract and provides a communication system to help proliferate the good bacteria which will crowd out the bad bacteria. Probiotics are so yesterday, and should not be taken with this product to achieve a better balance.

Do your own search through Google and YouTube for more confirmation about all of this. Oh yes, my bowels, narcolepsy, spaciness are all improving. Start slow, like a drop at a time at first. The only downside, if there is one, is that it needs to be taken indefinitely since our environment is so toxic.

---

#### Amazon review:

I can't explain what this product does or how, but I can tell you I noticed a difference in my well-being within days. I just felt better. More energy, less bloating, no more upset stomach. The real plus is I am so sharp at work now and able to concentrate. I signed up for the auto ship and plan to continue this supplement indefinitely. I've begun my dog on it as well, he's had severe yeast and skin issues. So far, I can't tell if it is working as well for him as it has for me, but I'm optimistic. It definitely has made him more regular, without any more diarrhea. I highly recommend trying it and I hope it works for you as it does for me!

## Comments:

When I was in my teens, I had a bad complexion. My mom felt sorry for me, and she took me to see a general practitioner. I think back in those days, they didn't have a lot of specialized medicine. The doctor put me on high-dose antibiotics indefinitely. The doses were so high, and for such an extended length of time that after a year or two, my body began rejecting the antibiotics and I began having an allergic reaction.

Needless to say, it destroyed my natural biome. But back then, we didn't even know there was such a thing as a biome. As I grew older, and more information became available to me, I started piecing things together and doing more research, and was led down a path trying to find out why I was having so many stomach problems. I knew it was a result of the antibiotics I took when I was younger, but nothing seemed to help. Nothing at all.

Early on in my quest, I've tried massive amounts of yogurt which didn't help at all. Then I learned there was a new supplement out that was supposed to be even better than yogurt. It was called probiotics. I thought "Wow! This has to be it! This has to be the supplement that would help my stomach problems." So I went on a journey trying just about every probiotic on the planet and experimenting in varying quantities. Did they help? Not at all.

Then about 3 months ago while doing more research, I found a supplement called Restore. I was skeptical at first, mainly because I've been thoroughly disappointed with everything else I've tried and wasted my money on. But I can honestly say, without a doubt, that Restore is the first supplement I've tried in over 40 years of searching that has really, truly, and honestly helped my stomach problems caused from taking high-dose antibiotics 40+ years ago!!! It was a miracle for me!

Now, I take Restore everyday, my stomach problems are gone, and I'm happy! I also give my 6- and 8-year-old children Restore to help protect them from the onslaught of harmful chemicals found in our food today. Thank you for your help in finding the true way to keep our gut healthy. I'm proof that Restore really can make a difference in your gut health.

---

This is great stuff. I have been using it for about 6 months, acid reflux gone, no longer needing all the digestive aids I was using, and a cough I have had for 4 years is gone. If you suffer from digestive problems, you need to try this!

---

I tried everything. Nothing worked. Name the probiotic. Some did nothing. Some made things worse. Antibiotics destroyed my colon. Then, of course, here came the candida nightmare. What was wrong? Did I have parasites? Heavy metals causing candida? Went to the gastro doc ... (colonoscopy, ugggh) who said I am clean as a whistle. No problems he could see. I'd like to personally thank the doctor I trusted for the constant hit from the unnecessary antibiotics.

What a mess.

I just stumbled on Restore. Pure accident. Thank you, God, for this product. You want to get rid of all of it? Just give this a try. I am telling you there is NOTHING else like it. Seal up those tight junctures ... and heal.

Update 12/29/16: I am taking one tablespoon on an empty stomach every morning. This stuff has completely relieved all my intestinal problems. I will never be without it again. I have had a couple of cheat meals because of the holidays and they have not made me sick. Now ... I will not do this regularly. I am eating clean now, and I don't want to screw that up, but the little I did do did nothing to cause me any misery. It took a long time for me to find something that would cure my IBS/colitis/inflammation ... this did it. I no longer care for sugar, breads or dairy, with the exception of grass-fed organic butter and eggs ... and not every day. I don't even crave sweets anymore. I am back here right now to purchase another bottle!

Go to YouTube and listen to Dr. Zach Bush! You won't be sorry. You won't need another probiotic.

---

I love Restore. Had the worst headache and detox symptoms for three whole weeks, which only told me how out of balance I really was. Some of the changes Restore has brought to my family ( after two months of daily usage) are:

- night terrors completely gone
- skin hypersensitivity 90% gone
- less irritability and able to maintain calmness in moments that used to bring about rage
- sensory issues greatly reduced
- better, healthier appetite in one of my children
- anxiety either completely gone or greatly reduced in the other members of family
- depression symptoms completely gone
- new fingernails growing (bizzare)
- brain fog 90% reduced or gone on most days

Thank you from the bottom of our hearts!! We love you, all of you in the Restore team!!!

---

My husband and I have been taking Restore for almost a year now. I started him on Restore with the hope that it would clear up his decades-long sinus infection. There was no

improvement with that, but there was a MAJOR improvement in a different area. A few months prior to starting Restore (he is 77) he had been having trouble with performing sexually – most of the time he could not get an erection at all. But after being on the product for a couple weeks, there was a very noticeable change with that, and as time goes on, I tell him he's continuing to “get younger”! He has not had a problem with erections since. I think you could call the product an all-natural Viagra.

I doubt this is something that can be included in testimonials, but I am curious if you have heard similar results from others.

---

I am new to Restore. I received my first bottle on Friday, March 10th, 2017. I have (had) leaky gut and all related physical disease caused by leaky gut. I started with, and continue with, 1/4 teaspoon 3 times daily before meals (about 30 minutes). I noticed on day #2, Saturday, that I had a totally different feeling which was one of re-balance and the beginning of the elimination of my ailments. This newfound wonderful feeling of regaining my health and vibrance comes after more than 2 years of continuing suffering, seeing many different types of specialist MD doctors who did nothing to find what my problem was being caused by. This included several gastroenterologists. I began to take a full regimen of Youngevity vitamins and minerals supplements which did begin to help me regain the 20 lbs. that I had lost over the 2 years. My normal weight is 140 lbs., which is my current weight since being on the supplements. However, the leaky gut was still causing me problems until I stumbled upon Restore and ordered the product. Being conservative about taking new supplements, I usually start with reduced dosages, as I did with Restore. I plan to remain on Restore forever, and I promote the Restore product to everyone and anyone who shows interest in finding a remedy for their own illnesses that may be related to leaky-gut syndrome. Thank you, Dr. Bush and all others who have worked to create this wonderful magical supplement. It is a lifesaver for sure, as some people who have long-lasting misunderstood illnesses will sometimes contemplate ending their lives rather than continue with the misery that leaky-gut syndrome brings to them without hope.

5.0 out of 5 stars

I've only been using this for a few days, but I really can't believe the difference. I am 24 years old and have had digestive issues my whole life. A few months ago I was diagnosed with multiple chemical sensitivity and leaky gut. I've been at a loss, trying everything from vitamins and minerals (which have helped some) to supplements, digestive enzymes and just

about everything under the sun. Though my diet is limited to low-salicylate and low-histamine foods, I had not seen any improvement in my energy (just a reduction in the allergic/digestive reactions that happen when I eat too many foods that are high in salicylate or high in histamine) until trying Restore. I woke up this morning and something was just different. I can't wait to keep taking it, I have no doubt that this was what caused the change, as I've been following the specific diet for about 10 weeks and again, had seen no improvement in energy, just a reduction in symptoms. AMAZING.

---

I can't speak highly enough about Dr. Bush or Restore. He has literally saved [our son]. I am not being dramatic when I say that. When my son had his first appointment with Dr. Bush at 6 years old, he was spinning in circles, ticcing and had major speech delays and learning issues. My son is now doing great. Reading above grade level, does public speaking as a Civil War drummer boy to large groups, etc. He just did a Facebook live with his favorite historian at the Civil War Trust last Friday and is already dreaming of where to go to college and study history. At 6, my husband and I wondered if he would ever be independent. Huge strides on Restore.

---

My son has megacolon, which is a birth defect where the nerves never traveled down the intestines properly during pregnancy. He had constipation issues from birth, even though he was breast-fed and I was dairy free and careful with my diet while nursing him. At 16 months he was hospitalized with salmonella and put on IV antibiotics. At 4 he was diagnosed with megacolon and put on Miralax by the head of pediatric gastro at U.V.A. When I questioned the safety, I was told that it was an inert sugar and just an osmotic. Safe as water and could and should be used for life. Nathaniel contracted rotovirus and was hospitalized again on IV antibiotics. My ex-husband had also given him a clean-out dose of Miralax when he had rotovirus, causing him to be very, very ill. The next fall Nathaniel got a parasite and was put on a strong antibiotic for 30 days. He began ticcing. He could hardly walk from tics. Step Touch Step Touch. Spinning in circles, not talking, panic attacks, night terrors, lining up his toys instead of playing. He was diagnosed with PDD-NOS, sensory-processing disorder, anxiety, OCD. He was having terrible pain about 20 minutes before a bowel movement that would double him over. I started to wean him off of the Miralax and over the next few months the tics and other behaviors improved. Then my ex-husband had him for a weekend and gave him Miralax. The tics and all of the other behaviors came right back. Very strong cause and effect.

I took Nathaniel to my husband's doctor — Dr. Zach Bush in Charlottesville, Virginia. He helped us to work on diet. Nathaniel was already gluten-free and dairy-free, but we tried to do as much organic food as possible. Lots of greens, fermented foods. We do cultured butter,

fermented carrots, fermented pickles, fermented salsa. And Restore. Restore has made the most difference.

---

I continue to use Restore, which is vital to my self-developed program of wellness, now six years cancer-free after removal of a gastric tumor, after which I suffered simultaneous DVT's, heart attack and stroke (complete with a Code being called ... near-death experience). Restore was the missing link that I needed. In fact, while vacationing last year, I missed using Restore for 3 weeks; indeed, GI symptoms and general health imbalances returned.

From this unexpected turn of events (my stroke caused partial blindness, loss of job, inability to drive), I channeled my knowledge into becoming a Health Coach. Currently I am training for a half-marathon later this year. Thanks to Restore, I will be crossing that finish line with a smile on my face!

---

Two years ago my stomach problems were so bad I was throwing up two to three times a week and miserable. Missing my kids' events, always having to apologize for letting them down all due to heartburn, reflux, and getting deathly ill every few days. My mom, who has stomach issues as well, suggested I try Restore. At that point I felt helpless and like my life was wasting away. I didn't take any the first day she brought it over. The next morning I had one of my weekly spells. Finally, after being sick all morning, I look up and see the Restore my mom had brought me. I thought, it's worth a shot. Heck, what did I have to lose. The day I started taking it my life changed. I have yet to throw up or get sick since I began my journey. My heartburn stopped, my acid reflux was gone, and after doing taking it for just a few weeks I started to lose weight and feel healthier over all. That's when I started to learn how it worked and how it had cleaned out the bad bacteria in my body and created the ideal environment for good bacteria to grow and flourish. My immune system was stronger than ever and I learned that a large part of my immune system starts in the gut. At first only I took the Restore. When school began and the kids started coming home with stomach bugs and catching viruses, I decided to have my entire family taking Restore. I started giving it to my kids and husband twice a day and I continued to use it. We are all healthy and happy!!! Restore is the best product I have ever used. As the name says, it restored my life back to ideal healthier happiness!!!

---

I am so beyond grateful to know about this. My mom grew up near potato fields sprayed with pesticides and it ruined her health, especially her mental health. After one week on Restore, I have never seen her more alive and NOT depressed!!!! Thank you for giving her a second chance at life.

It has only been about 2 weeks but I really LOVE this stuff so far. I first heard about it on a Lyme Ninja Radio podcast in 2015 where Mackay Rippey interviewed the creator Dr. Zach Bush. I put it in the back of my mind as something interesting to try but never got around to it. This year, my dad had recurrent bouts of MRSA and he took numerous antibiotics and I wanted to get him something to help clean up his gut so I bought Restore. After a few weeks, he mentioned that he was sleeping better than he has in decades so I figured I would give it a try. I'm not exactly sure what my health issue is. I've been through various dietary changes and treatments over the years that have helped, but nothing quite returned me to normal yet. However, after trying Restore I noticed that I was getting glimpses of my former level of expression and level of energy ... like my personality was able to better express in full whereas before it was always hampered by fatigue and a low level of brain fog. Even though it has only been about 2 weeks, I was able to have a busier week than I've had in years. I'm only able to take 1/2 teaspoon so far ... If I take too much I get some symptoms, so I am going slow and building my way there over time. I'm truly impressed with my response to this product so far and plan on continuing with it and building up to the full dose! Thanks for creating a helpful product! Note: I take really good care of myself (diet and lifestyle), so that may factor into my quick and positive response.

---

Amazing product! My gut health is so improved. I have been able to eat stewed tomatoes first time in 5 years. Flatulence greatly diminished. Bowel function 3-4 times a week now. I used to need to take three Dicolax and 1/2 bottle citrate magnesium to eliminate waste. This supplement is a miracle. Four of my friends now use this, love it and have had wonderful healing also. I had a non-stop runny nose for over a year. Two days after using it my nose no longer runs incessantly. I have had gastritis, constipation, leaky gut. This alleviates all of those problems. I LOVE Restore 4 Life. I feel better than I have in last 5 years. Try it. I started with 5-6 drops at a time. After 2 months I am using 35 drops at a time. Small bottle has a top to measure out drops with.

---

I have seen an amazing changes with my son on the autism spectrum. I posted a video on two of my mommies' groups of my son because the changes are amazing. He has stopped stimming and is becoming more confident. He is 5 years old and this is blowing me away. Also I live in Charlottesville for 4 years and have friends in Scottsville :-). Then some of the moms told me to watch Dr. Bush's video.....The changes started on day 5!!! He's talking more and yesterday asked two little girls to play hide and seek with him! He's never done that ... He then played hide and seek with them for 30 minutes. He has not been on Restore even two weeks. I am watching your video because my brain is saying where has this been for our 3 years of trying EVERYTHING with very good ASD doctors!

---

I have been struggling with adrenal fatigue for close to a year. I was never tested for leaky gut, but my naturopath said she was certain I had it. I had SEVERE skin issues that left me really depressed and unhappy. I also had food sensitivities that would cause my hands to swell up. I was taking so many supplements I needed a spreadsheet to manage them all. I was introduced to Restore by an alternative-medicine practitioner. Within 2 or 3 weeks of taking it, my skin is clear and I have little to no inflammation in my hands. I am a believer. I've referred it to all of my friends suffering immune issues. A healthy gut is where it starts and this stuff was a godsend for me.
